There are more courses can be selected in the summer school program besides these 9 selective courses on the list. You can choose courses from both the list and summer school to meet the needs of 18 credits.

International Undergraduate Program in International Economics and Trade

Brief Introduction

The School of International Trade and Economics (SITE) offers International Undergraduate Programs entirely in English. Professors, faculty members and administrators communicate and all course materials, including books and brochures, are provided in the English language for international students who are interested in upgrading their qualifications and who wish to pursue a Bachelor's degree in International Economics and Trade.

The International Economics and Trade curricula offered by the International programs of SITE equip students with a sound and wide-ranging International Economics and Trade knowledge of the world and China's place in it, in combination with a focus on practical experience. Our particular curricula including intensive Chinese Mandarin courses, Social Work, Practicum, Exchange Program, International Economics and Trade Internships and International Economics and Trade Research Seminars provide many valuable opportunities to gain practical experience in job markets and a deep understanding of Chinese language and culture. Under the guidance of our excellent faculty, you can prepare yourself for a promising career after the successful completion of the program. Upon completion of the program, you will be able to examine problems from a variety of perspectives and will be able to research a variety of sources and make critical assessments based on your findings.

Advantages of studying in this program:

1. You will be at a leading Chinese university that provides first-class intellectual support to build a more open China.
2. You will be working with experienced and high-quality faculty with diversified cultural backgrounds.
3. You will be studying and living with people from over 100 countries on one of the most international campuses in China.
4. You will be studying in one of the most international and dynamic parts of Beijing and witnessing firsthand how globalization is impacting an ancient society that is now creating economic miracles.
5. You will join a first-class and most advanced program in China that emphasizes competence and provides a clear path to achieve the essential aims and outcomes.

Training Objectives

The objective of the Bachelor's program is to prepare students for positions in non-governmental and business sectors by providing them with an up-to-date theoretical background, analytical techniques and flexible, practical skills in a variety of fields. All international students will learn a multidisciplinary branch of social science that addresses issues of concern to China's development. This program will prepare students with foresight, competencies, and higher-order skills to function effectively and competitively in an evolving social and global environment.

Through the general education program and study in the International Economics and Trade major field, students should:

1. Master the basic theory of international trade and economics, certain professional skills, and familiar with international trade and economics rules.
2. International vision, cross-cultural communication ability, competent in international economics and trade related work.
3. Master the main research methods and analysis tools, have realistic innovation consciousness and spirit, and have high analytical ability, innovation ability and decision-making ability.

4. With the self-learning ability in the international trade and economics field, master the frontier of the development of the discipline by reading the latest research literature, and have the potential for further study.
5. Know how to integrate international trade and economics knowledge and skills to solve complex real-world problems.

Career Opportunities:

Graduates can be employed in a wide range of attractive and challenging careers in both private and public sectors in China and abroad.

1. Trade or Economics
2. Government Service
3. Economic forecasting
4. Teaching
5. International relations
6. International Economics and Trade policy analysis
7. Graduate work or professional studies.

Research Orientation

International Economics and Trade

Educational System and Duration

The number of school years for this program is 4. The maximum school years are not longer than 6 years. For a student fulfilling the plan ahead of time with the dissertation qualified for defense, it can be allowed for defense, graduation and application of the degree ahead of time.

Credit requirements (Third and Fourth Year in SITE)

For International Economics and Trade

Third and Fourth Year: 66 credits in total	<ul style="list-style-type: none"> ● Compulsory Courses (33 credits) ● Elective Courses (at least 21 credits) ● Practicum (8 credits) ● Thesis (4 credits)
--	--

Thesis

Thesis Writing

In addition to compliance with the provisions of school, a thesis must be written in a systematic and complete manner, presenting clear concepts, correct argument, realistic description, concise writing structure, smooth and concise writing style, correct calculation, reliable data, and clear icons.

Thesis Evaluation

The thesis should be written based on students' own study and research. In the fourth year of their study, students must complete a thesis related to their major to meet the graduation requirements. The length of the thesis should be around 8000 words. The thesis is a milestone assessment on the intended level of achievement both in the major and the general learning outcomes by the students. Specifically, students must demonstrate the ability to apply their learning to complex, unscripted problems in the context of their advanced studies, the mastery of the skills required for their disciplines as well as essential learning outcomes including the breadth and the depth of their knowledge, critical and creative thinking, problem solving, the ability to integrate knowledge and skills and present their work in an appropriate manner. A subject of ECO491 Research Seminars helps students how to write the thesis.
