Guide to Information Confirmation for International Students for the Spring Semester of 2024

Hello to all students:

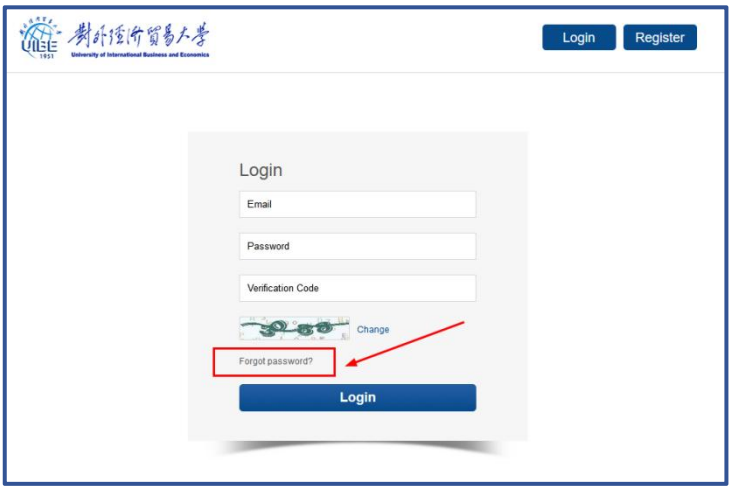

To ensure a smooth start to the spring semester of 2024, please log in to the following website within the three days before onsite registration, upload the relevant documents, and complete the information confirmation.

1. Login to http://202.204.172.146/

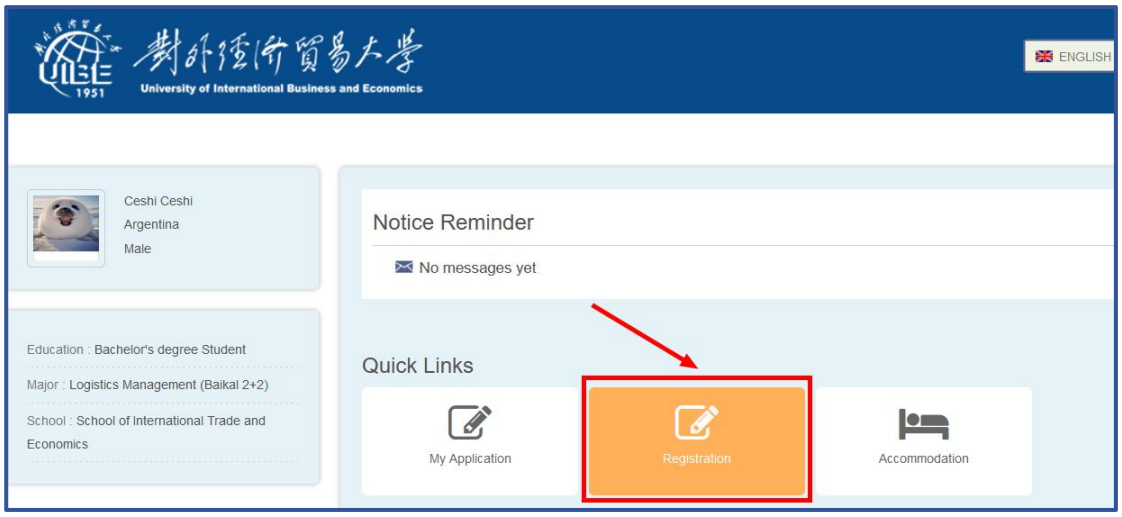

Account: Use the email used during online application.

Password: Password set during application.

If you forgot your password, please click on 'Forgot password?' below the verification code on the login page to support resetting your password.

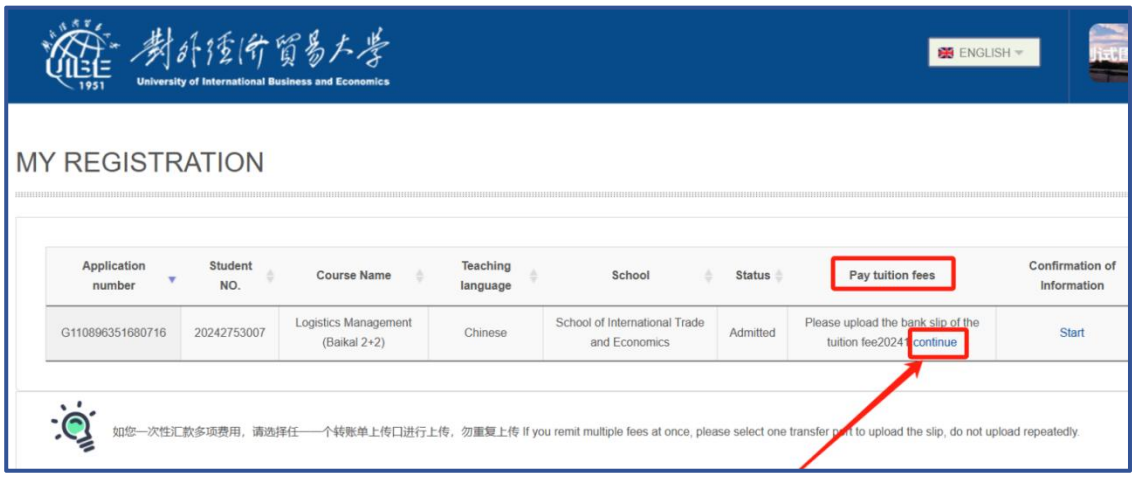

2. Click on "Registration"

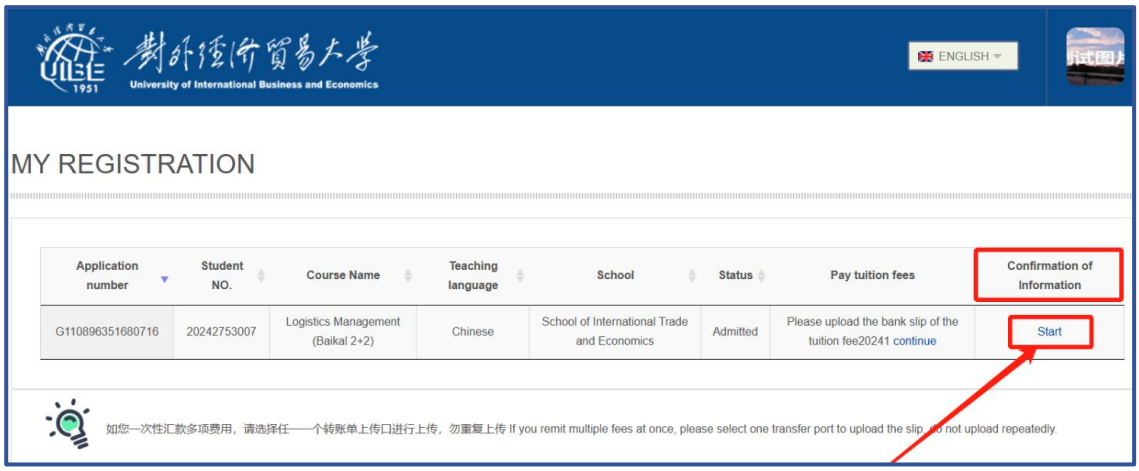

For students paying tuition through bank transfer, after clicking on the **'Registration'** module, select **'Continue'** under **'Pay Tuition Fees'** fill in the required information as per the instructions, upload the transfer receipt, and click submit.

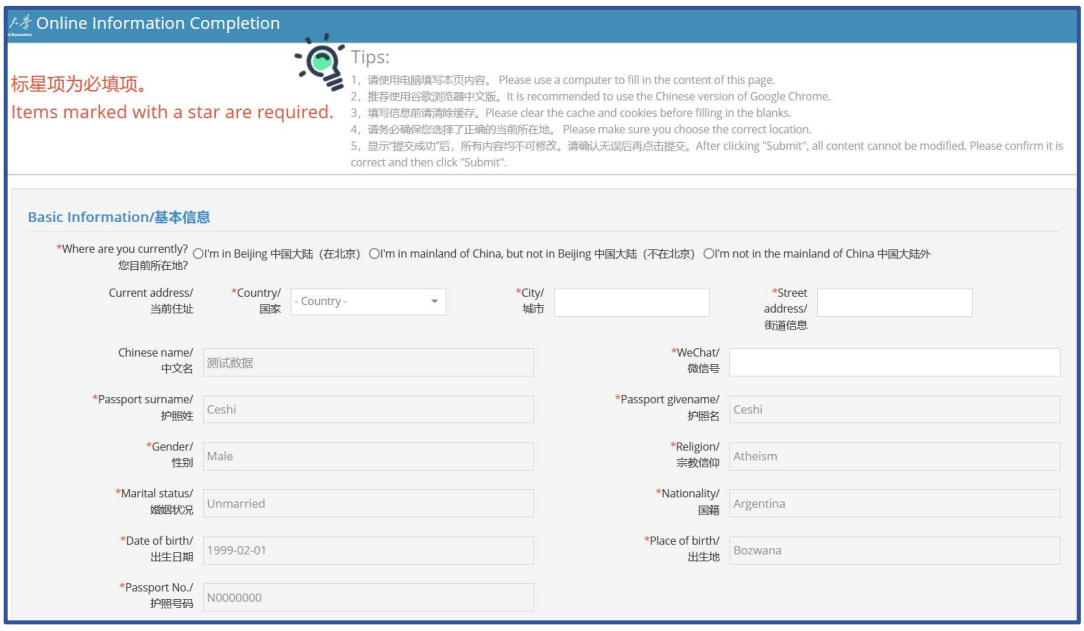

The tuition transfer receipt must include identifiable information such as the student's English

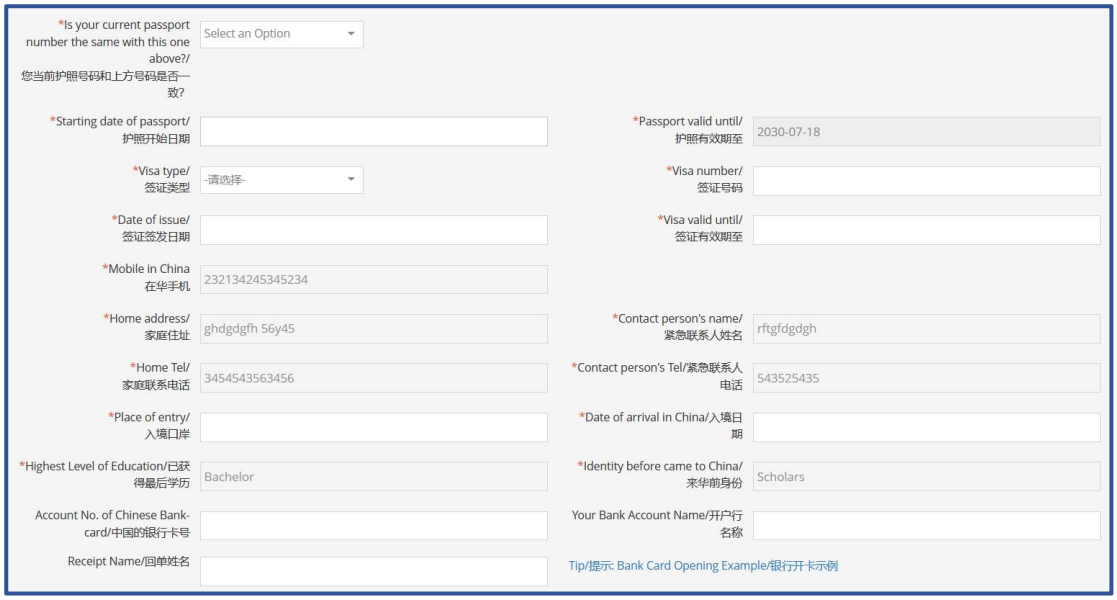

name, student ID (for returning students) or passport number (for new students), and the School of International Education account code '108', among other details.

Students who have not transferred tuition fees can click **'Start'** under **'Confirmation of Information'** on the right to update their personal information. After verifying that there are no errors, click "Submit".

- **WeChat serves as the primary channel for real-time communication between the school and students. New students must accurately and completely fill in their WeChat ID; otherwise, they will be unable to complete registration and commence their studies. Due to the lengthy original ID characters generated by the WeChat system, students should first set a personal WeChat ID on their mobile phones and then enter the updated WeChat ID in the information confirmation link.**
- **For students who have opened a domestic UnionPay account in China, it is necessary to provide the bank card number and upload the account opening certificate.**
- **If a student currently resides in mainland China, information such as the entry port, accommodation registration, and visa details are mandatory.**
- **If new students only submitted proof of enrollment or a pre-graduation certificate during the application, they must upload their graduation certificate during online registration.**
- **All information must be filled in accurately and truthfully; otherwise, the consequences will be borne by the students themselves.**
- **It is recommended to use the Chinese version of the Google Chrome browser and perform a cache clearance operation before logging into the system.**
